SCHOOL REPORT.

Report of the Board of Education of the Town of Campton, March 1st, 1887.

The schools as a whole in this town have been successful and profitable. The teachers we think have used their best endeavors to do justice to each pupil, and as a general rule the scholars have shown a marked improvement in the several branches taught. Scholars are not all alike; some more studious and attentive than others, and apply themselves more closely, and the result is very evident to the most casual observer, or visitor. We think if parents would take more interest in visiting their schools, it would be a great help, not only to the teacher, but also the scholar. It acts as an incentive to the pupil, also a help to the teacher in governing the school. We are apt to trust too much to the teacher. We select and place them in the school room with our children and there we leave them for one-fourth of the day without one thought how they are getting on, or whether they are even in the school room or in some other place in the vicinity. We could name some districts where this has been much too often the case the past winter. The school room is the place for every scholar during school hours.

In regard to the several school districts in town, we have endeavored to unite them in a way that would give the greatest number of scholars the benefit of the money expended.

There have been no schools in districts Nos. 7, 13 and 14; but the scholars in said districts (if any) have had the privilege of attending the school located nearest to them. District No. 1 was classed with No. 14; No. 3 with No. 12; No. 5 with No. 6; No. 8 with No. 10, and the time of the commencement of each school was so arranged that the scholars of each district might have the benefit of both schools, thereby receiving nearly double the number of weeks schooling. We are sorry to say that some of the people have not availed themselves of this privilege, failing to see the benefit their children might have in the increased length of the schools, preferring the old district plan. We are fully in accord with the *new law*, yet fail to see how we can reap the full benefit in one year. Considering the financial condition of the town

we have thought best not to build new houses this year or expend very much on the old ones. Thinking it would be best to unite two or more districts into one, as the necessities of the case may require, and build new, when and where it will be for the best interest of our townsmen. The twelve hundred dollars raised by the town for school purposes has been divided between the different schools in proportion to the number of scholars.

We have had no lease, literary fund or dog money the past year to help lengthen out the schools, as in former years. The coming year there will be some three hundred dollars which will be quite an item in addition to what the town may raise. The school board have made it a point to progress slowly in making any permanent change of the districts. What has been done was more of an experiment so that our people could judge somewhat of the working of the new law.

T. S. PULSIFER,
WM. A. SMITH,
C. W. JOHNSON, JR.,
} *School Board of Campton.*
